

## GAME READY: DISCORD

The invite key for the WellPlayed Discord Channel is:

<https://discord.gg/cmxEhw>

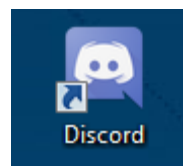

You'll also be sent an email with your Squad number and a link to your squad's voice channel. If you haven't received an email from us with these details by Friday 23 November, let us know at [info@wellplayedproject.com](mailto:info@wellplayedproject.com).

### CONFIGURING DISCORD

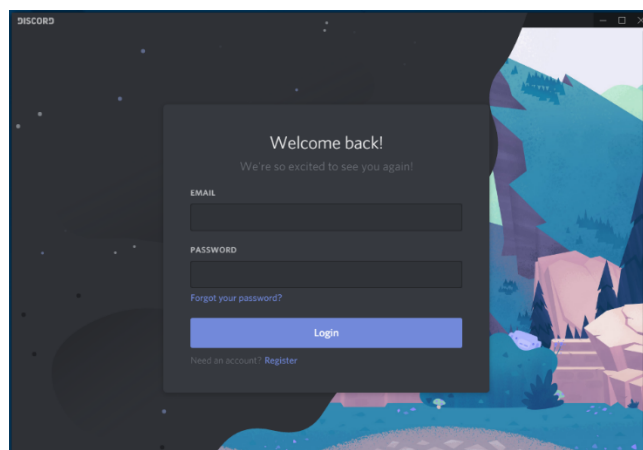

Discord is the communication software you will use to talk to your squad during gameplay. Make sure you've plugged in your microphone prior to launching Discord.

The **Ninite installer** will have placed Discord in your installation directory and you should also see the **Discord icon on your Desktop**.

Launch Discord by clicking on this icon

When you launch Discord for the first time you will be presented with the default login menu, which looks like this:

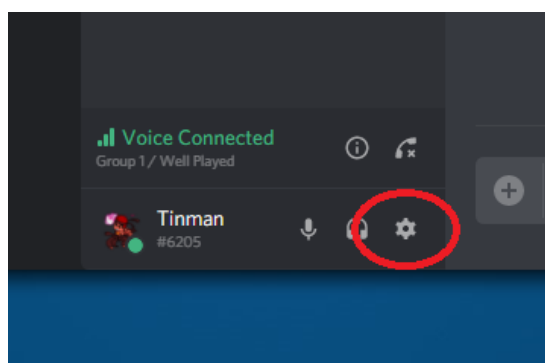

**Have a registered Discord account?** Log in using your existing account.

**Don't have a registered account?** You will need to create an account by clicking on 'Register' at the bottom of the menu.

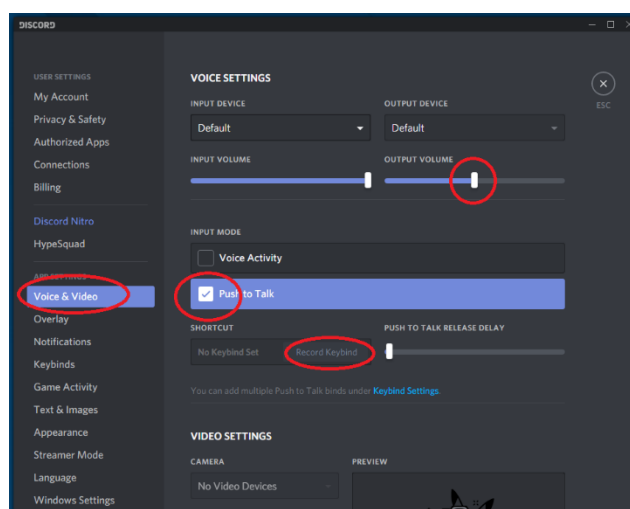

This will present a similar menu allowing you to register an email address, username and password. Details of your account will be emailed to you which you will need to activate to log in.

## Setting up your mic before joining the WellPlayed Discord Channel

The microphone settings can be found by clicking on the **User Settings** icon in the bottom left, which looks like a cog.

This will open a new menu with **Voice & Video** under **App Settings** – your squad members will appreciate it if you do this before gameplay!

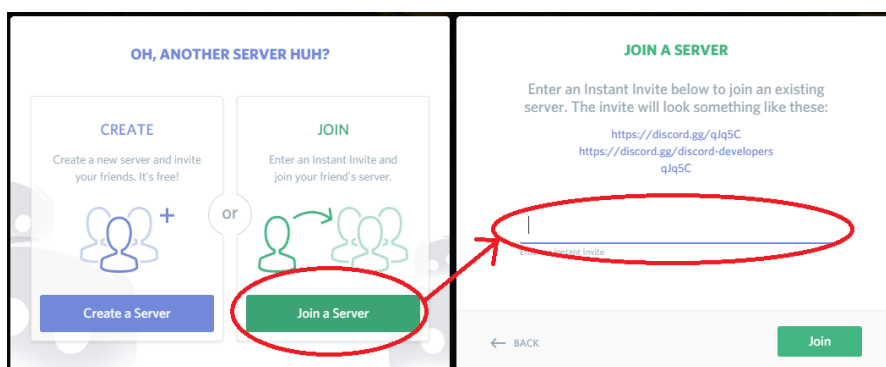

**'Push To Talk'** is a great option and you can bind this function to a key – click on **Keybinds** in the **App Settings**. It ensures your squad only hears you when

you push the key... and they won't have to hear your breathing or random commentary.

## Joining the WellPlayed Discord Channel

Click on the big **Plus (+)** symbol on the **far left of the Discord Menu**. This will present you with the option to create or join an existing channel.

Choose the join option and place the **WellPlayed Discord Invite key** into the space as shown below. Here's the key: <https://discord.gg/cmxEWhw>

When you have successfully joined the **WellPlayed Discord Channel** you will be placed in the General voice and text channel by default.

To join your **Squad's voice channel**, check through the channels section of Discord and join the channel for your Squad Number. You can also go directly to your Squad channel using the link we send you or via your Squad page on the WellPlayed website.
